READING PART 2

*Read the texts 7-14 and the statements A-J. Decide which text matches with the situation described in the statements. Each statement can be used **ONCE** only. There are **TWO** extra statements which you do not need to use. Mark your answers on the answer sheet.*

A. Wants to improve how she plans her study time to avoid last-minute pressure.
B. Learns better through group discussions and explaining ideas to peers.
C. Is most successful when working in silence and following a personal schedule.
D. Prefers doing practical experiments rather than reading from books.
E. Wants to increase her reading speed and comprehension.
F. Needs to find ways to concentrate in noisy environments.
G. Gets distracted by others and prefers independent study.
H. Would benefit from flexible learning without deadlines or rigid structures.
I. Likes to study with access to scientific equipment and hands-on activities.
J. Needs a calm space and freedom to decide what to study and when.

Teacher Jamshid

7. Mila often finds herself rushing to finish her assignments and leaving revision until the last moment. She wants to learn how to make better use of her time so she can feel more in control and avoid late-night studying before tests.

8. Jin doesn't enjoy studying alone and feels he understands things better when he can talk through topics with others. He's looking for a study environment where he can regularly exchange ideas and get help from peers.

9. Sara is very curious about how things work, especially in science. She's not content with just reading textbooks—she wants the chance to try things out herself, use equipment, and see what she's learning about in class.

10. Leo values peace and quiet when he studies and prefers to work without interruptions. He learns best when he can choose what to focus on and when, without following a fixed schedule or working too much with others.

11. Farida enjoys reading and writing but finds it difficult to stay focused when others are talking nearby. She's searching for a quieter space where she can concentrate on her tasks.

12. Ben prefers to study alone at home and sets his own schedule. He doesn't like being told what to do and works better without strict rules or group pressure.

13. Aisha loves science class because of the experiments. She finds it easier to remember things after seeing or doing them herself, rather than just reading.

14. Samira often struggles to finish her reading assignments on time and sometimes has to read the same passage more than once to understand it. She wishes she could read faster and remember more, especially when studying long texts for exams. She is looking for strategies to boost both her reading speed and comprehension.

READING PART 3

Read the text and choose the correct heading for each paragraph from the list of headings below. There are more headings than paragraphs, so you will not use all of them. You cannot use any heading more than once. Mark your answers on the answer sheet.

RULES TO FOLLOW WHILE EATING FRUIT

A) The effects of fruit on fat loss	**E)** How to buy fruit on a budget
B) The benefits of choosing low-sugar fruits	**F)** Blueberries as a healthy fruit choice
C) Why vegetables may be better than fruits	**G)** Fruits may contain more sugar than expected
D) Fruit is not always a "free" food	**H)** The link between fruit and cancer

15. Because some fruits contain less protein and more sugar than fruits like berries, fruits with higher sugar content and higher sugar content, such as bananas, mangos, and grapes, can quickly boost blood sugar levels. Stick to lower-sugar choices like blueberries or raspberries if losing weight or lowering your chance of developing diabetes are among your health goals.

16. The main causes for getting more sugar into your diet than you ever expected are actually some of the fruits we're advised to consume every day, like apples. This is especially true because you're probably giving yourself a pass to have an apple (it's healthy!) and a sweet treat later in the day. One medium apple has roughly 19 grammes of sugar in it, just in case.

17. Blueberries and other fruits provide a variety of minerals, protein, vitamins, and other beneficial components that together reduce the effects of the sugar they contain. Despite having a high sugar content, blueberries have a comparatively low blood sugar index because of their protein and minerals. Studies have really shown that blueberries can lower your chances of developing diabetes and assist to balance blood sugar levels.

18. Fruit is claimed as being a "free" item in some meal plans. I'm sorry to break that idea, but eating bananas nonstop won't benefit you. More than a few pieces of any fruit per day, and even fewer for those who are sugar-sensitive, can prevent fat loss.

19. Here is a quotation I really like on the subject: Vegetables are the obvious winner, according to Dr Jonny Bowden in The 150 Healthiest Foods on Earth. "If you put a gun to my head and made me select one of the two categories, it would be no contest," he writes. "Vegetables offer almost all of the vitamins present in fruits, and doing so has a far lower blood sugar impact."

20. Use these lists to guide your fruit purchases if you're on a limited budget, don't have access to clean fruits, or just need assistance choosing. It is not required to purchase fresh food because the "Clean Fifteen" list includes the fruits and vegetables that have the fewest chemicals. Alternatively, the "Dirty Dozen" list includes the food that you should buy organically because it contains the most chemicals.

READING PART 4

Read the following text for questions 21-29.

MODERN ART

Modern art can be defined as artistic works produced during the 20th century. This art style is characterized by a departure from traditionalism and the use of new artistic forms such as abstract expressionism, minimalism, conceptual art, and pop art. Modern art has been an important part of the cultural landscape of the 20th century and continues to influence the artistic works of today.

One of the most significant developments in modern art was the emergence of abstract art. Abstract art is characterized by the lack of representation of recognizable objects or figures. It focuses on the use of colour, form, and line to create a visual language that represents emotions and ideas. Abstract art was popularized by artists such as Wassily Kandinsky, Kazimir Malevich, and Piet Mondrian. The emergence of abstract art in the early 20th century represented a major departure from traditional art styles, such as realism and impressionism, and paved the way for the development of new forms of artistic expression.

Another significant development in modern art was the rise of pop art. Pop art emerged during the 1950s in Britain and the United States and was characterized by the use of images from popular culture. Pop art was a response to the consumer culture of the post-war period and the increasing influence of advertising. Pop artists used images from popular cultures, such as comic books, advertisements, and consumer products, to challenge the traditional boundaries of art and the distinction between high and low culture. The most famous pop artist was Andy Warhol, who became famous for his paintings of Marilyn Monroe and Campbell's soup cans.

Conceptual art was another significant development in modern art. Conceptual art emerged in the 1960s and was characterized by a focus on the idea or concept behind the artwork. The physical object created by the artist was often secondary to the idea behind it. Conceptual art challenged the traditional notion of what art was, and what it could be, by emphasizing the intellectual rather than the aesthetic qualities of the artwork. The most famous conceptual artist was Marcel Duchamp, who is famous for his readymade – everyday objects that he appropriated and presented as art.

Minimalism was another important development in modern art. Minimalism emerged in the 1960s and was characterized by the use of simple, geometric shapes and a focus on the relationship between the artwork and the surrounding space. Minimalist artists sought to create a pared-down, stripped-back aesthetic that emphasized the essential elements of art. The most famous minimalist artist was Donald Judd, who became famous for his square boxes and stack sculptures.

In conclusion, modern art has been an important part of the cultural landscape of the 20th century and continues to influence the artistic works of today. The emergence of abstract art, pop art, conceptual art, and

Teacher Jamshid

minimalism all represented significant departures from traditional art styles and paved the way for new forms of artistic expression. Modern art challenged the traditional notion of what art was and what it could be, redefining the boundaries of art and inspiring artists to explore new avenues of creative expression.

For questions 21-24, choose the correct answer A, B, C, or D. Mark your answers on the answer sheet.

21. What is one main feature that distinguishes modern art from earlier art styles?

A) It is based on religious themes.

B) It emphasizes photo-realistic representation.

C) It departs from tradition and adopts new artistic forms.

D) It only includes paintings created in the 19th century.

22. Why is abstract art considered a major development in modern art?

A) It focuses on drawing people's faces.

B) It was the first style to use photographs in paintings.

C) It uses traditional methods to create realistic images.

D) It breaks away from realism and uses shape and color to express emotions.

23. What did pop artists use to challenge artistic traditions?

A) Expensive and rare materials

B) Themes from classical mythology

C) Imagery from mass media and consumer products

D) Drawings of natural landscapes

24. According to the passage, what is the main focus of conceptual art?

A) The physical appearance of the artwork

B) The feelings of the audience

C) The price and materials used

D) The idea behind the work itself

For questions 25-29, decide if the following statements agree with the information given in the text. Mark your answers on the answer sheet.

25. Modern art has completely replaced traditional styles like realism and impressionism.

A) True **B)** False **C)** No information

26. Andy Warhol used images from popular culture in his artwork.

A) True **B)** False **C)** No information

27. Conceptual art rejected the importance of the intellectual side of art.

A) True **B)** False **C)** No information

28. Minimalist artists wanted to include as many decorative elements as possible.

A) True **B)** False **C)** No information

29. Modern art continues to impact artists working today.

A) True **B)** False **C)** No information

READING PART 5

Read the following text for questions 30-35.

THE RISE OF SUSTAINABLE TRANSPORTATION IN CITIES

In the face of growing concern for the environment and public health, sustainable transportation options have become increasingly popular in cities across the world. From cycling and walking to electric cars and public transit, communities are taking action to reduce emissions, improve public health, and reduce congestion.

The rise in biking and walking is one of the most obvious developments regarding sustainable transportation. In many cities, dedicated bike paths and pedestrian areas are being developed to provide safe and efficient transportation for those who choose not to take a car. These options not only reduce emissions but also improve personal health and provide a cost-effective alternative to driving.

Another key trend is the growth of public transit options, such as buses, trains, and subways. These options offer a sustainable transportation alternative for commuters and reduce congestion on the roads. Governments are spending money on infrastructure to increase accessibility and dependability of these choices, adding features like more frequent service, electric or hybrid bus additions, and route-planning applications.

Electric cars are another promising trend in sustainable transportation, offering a lower-emission alternative to gasoline-powered vehicles. With the cost of electric cars decreasing and charging infrastructure expanding, more people are considering making the switch to electric vehicles. In cities, electric vehicles also reduce traffic noise pollution and offer a quieter, more enjoyable experience for drivers and passengers.

Despite these promising trends, challenges still need to be addressed. Getting people to adopt sustainable transport is one of the main obstacles to its promotion. Governments, companies, and nonprofits are working hard to incentivize sustainable transportation, using everything from tax incentives to reward programs and education. Improving public transportation alternatives or creating more broad and accessible bike lanes are just a few examples of how to make sustainable transportation more practical and accessible for users.

Another key component of sustainable transportation is maintaining and improving the infrastructure. Roads, highways, bike paths, and other transportation assets require ongoing maintenance to ensure they are safe and reliable. Cycling and walking paths need to be maintained in a way that makes them safe and easy to use, while public transit vehicles and station infrastructure must be kept up-to-date and modern.

Sustainable transportation in cities is critical to addressing a number of pressing societal concerns, such as climate change, urban air pollution, and the health of local populations. Cities themselves have a rare chance to unite and effect beneficial changes as sustainable transportation choices continue to develop. It is up to us to embrace these trends and help support the transition to a more sustainable future.

Teacher Jamshid

*For questions 30-33, fill in the missing information in the numbered spaces. Write no more than **ONE WORD** and / or **A NUMBER** for each question.*

30. Cities are creating special bike and pedestrian areas to offer a _____ form of travel besides driving.

31. One feature added to improve public transport planning is _____ applications.

32. In cities, electric vehicles help lower traffic _____.

33. A major obstacle in encouraging people to use sustainable transport is changing their _____.

For questions 34-35, choose the correct answer A, B, C, or D. Mark your answers on the answer sheet.

34. What is mentioned as a way to encourage more people to use sustainable transport?

A) Offering discounts on petrol

B) Expanding roadways for cars

C) Providing tax rewards and education

D) Building more parking garages

35. According to the text, why is maintaining infrastructure important?

A) It reduces fuel consumption.

B) It helps public transport operate on time.

C) It ensures the safety and reliability of travel options.

D) It lowers the cost of electric vehicles.
